

# MANIFEST

## 1 ILE

---

Inspired by the “Institución Libre de Enseñanza” educational principles, our model aims to “avoid disturbing the periods of childhood and adolescence” in order to avoid prematurely advancing human divisions.

Furthermore, this vision assimilates the latest educational studies based on modern research in neuroscience.

## 2 HUMAN RIGHTS

---

On the basis of the Universal Declaration of Human Rights, we stand up for the freedom of education, equal rights and respect for human diversity.

Absolute respect and focus on the students, with a child-centred teaching-learning approach and active learning techniques, with special attention to individual personalities and their multiple intelligences.

## 3 LANGUAGES

---

English language proficiency.  
At Liceo Europeo it is imperative to foster language immersion in a multilingual background that assures the use and command of other languages including frequent foreign exchange programmes with other countries and cultures: English, Chinese, French, German...

## 4 VALUES

---

We encourage students to take pride in the job well-done. We teach self-confidence and promote the sense of duty, loyalty, curiosity and creativity which are the foundations of traditional European thought.

## 5 SCIENCE

---

We encourage the use of the scientific method, research techniques and active learning. Students elaborate their own books and reports in the laboratories.

## 6 FUTURE

---

We prepare our students with the certainty that they will become the scientists, writers, lawyers, doctors and engineers of the future. But, most of all, we strive to prepare “men and women” who will become leaders, capable of conceiving an idea and carrying it out in a successful manner. Creative students ready to improvise when needed to solve unforeseen problems.

# 7

## SPORTS

---

We believe in developing both students' minds and bodies thus providing them with modern sports facilities, including paddle courts and a swimming-pool, inside our 30,000 m<sup>2</sup> of gardens and green areas.

### liceoswim<sup>®</sup>

Indoor saltwater pool (20x10 m). Swimming school, pre-natal swimming courses, aquagym, swimming for infants, free swimming, therapeutic swimming and competitive training. And also scuba-diving school.

### liceofootball<sup>®</sup>

7 vs 7 football field. Headquarters and training grounds for the Federated Football league of Madrid.

### liceopadel<sup>®</sup>

Glass-enclosed paddle courts surrounded by pine trees and vegetation. Paddle school, classes and tournaments.

### liceobasket<sup>®</sup>

Indoor basketball courts for training and federated matches.  
Outdoor basketball courts for basketball school.

### liceorunning<sup>®</sup>

Athletics training, improvement of techniques and preparation for races.

# 8

## PLAYING

---

We acknowledge the importance of play in the learning process so that children learn to relate school with happiness from the very first days of school, at the age of two.

# 9

## TECHNOLOGIES

---

We strongly believe in technological progress, incorporating the use of cutting-edge technologies (electronic whiteboards, iPads, robotics, programming and digital design, techniques of animation...).

# 10

## ATMOSPHERE AND GROUP WORK

---

We are convinced of the need to create a caring learning environment which reinforces the student's self-esteem while promoting group work, autonomy, cooperative work...

# 11

## HAPPINESS

---

We have an unshakeable faith in the human race; therefore, we teach children that happiness is a right, and we educate them to always strive to make a better world.

## HAPPY CHILDREN AND STUDENTS

Our priority is to create an affective learning environment from infancy to university. Students grow and learn in an emotionally safe and creative atmosphere because the ages of infancy and adolescence are happy days that will always be remembered.

Each individual student should be the protagonist in their own learning journey; researching, creating, discovering and learning.

## EDUCATIONAL PROJECT

Liceo Europeo's educational project brings together six essential factors:

- Caring learning environment.
- Flexibility.
- Active teaching and learning.
- Results.
- Ideology and values.

We present our vision as a geometrical shape, as a hexagon, placing each student in the middle of our personalized educational project.
